

期末项目 Final-Project

根据课堂主题（图网络、强化学习、大模型），选择 2020-2026 近 5 年 CCF-A 期刊/会议论文，要求在该论文方法基础之上，完成论文方法的改进设计、代码实现和实验评测。要求完成：Following the lecture topics (GNN, RL, RL4LLM), choose one paper from CCF-A journal/conference paper within the most recent five years (2020-now), and design/implement/evaluate the improved solution. You are required to

- 2 页报告，内容包括原有论文的总结和改进方法设计和实验结果（包括新方法
与原有方法对比实验结果）2 page report including the summary of the chosen
paper, the proposed improvement and evaluation result.
- 20 页 PPT，对报告内容总结、并补充报告之外其它重要事项 PPT of 20 pages
including both the 2-page report and more items that could help you get higher
scores.
- 代码及执行截屏文件（截屏记录 console 输入并输出结果）、运行结果 source
code and screen video to track your input and output to the improved work.

作业提交要求：Submission Info

- 1) Deadline: 2026-06-21 23:59
- 2) 所有的文件打包压缩：学号-final-proj.zip. All files above are compressed into a
single zip file with naming convention: StudentID-final-proj.zip
- 3) 助教研究生同学将在 2026-06-22 13: 30 点随机抽取 15 名同学学号，于上课期间
现场报告 PPT 与演示作业。 At 2026-06-22 13: 30, TA will randomly choose 15
students who will give the demo your work and briefly report the PPT by 15 minutes.
